

## **Brush and Grass Collection**

The City provides curbside brush and grass collection to reduce the amount of organics being disposed at the County's landfill. Each year, Department of Public Works crews provide curbside pickup of tree limbs, hedges, hedge clippings, bushes and grass every other week between April and September each year. The exact dates of collection are released through a public service announcement in the media and can be found on the City website homepage under "Notices".

Through its curbside collection programs, the City collects approximately 700 cubic yards of yard waste on an annual basis, which is mulched at the City's yard waste site on Route 414. The mulch is then made available free of charge to residents during the yard waste site's seasonal operations.

To complement the City's brush and grass collection program, the City encourages residents to mulch yard waste in their back yards.
