

Curbside Recycling

Municipal recycling programs can lower pollution, decrease the use of new resources to make products, and reduce the amount of solid waste disposed at landfills. They also provide an easier way for residents to recycle increasing the likelihood of participation.

The City of Corning provides curbside recycling services to residents using the City's Blue Bag garbage collection system. Blue Bag users may place recyclable materials curbside for collection. These materials include glass, #1 & 2 plastic, cardboard, newspapers, magazine, and junk mail.

Additional information on collection rules can be found in the City's Annual Calendar and on the City website in the Public Works section.
