

Housing Strategy Committee

Report to the City Council for regular meeting dated September 2, 2014

The City staff continues to interact with our housing study consultants to clarify and refine the study content that is being developed.

In addition, the staff continues to schedule and engage in additional discussions with key stakeholders, discussions that are likely essential to the study's direction.

The next step is to hold a meeting of the Committee where the staff will make a presentation on the progress made thus far, and the direction going forward.
