

Safe Routes to School Program

The City of Corning is committed to providing school children with safe routes to schools.

The Safe Routes to School Program is a federal, state and local effort to enable and encourage children, including those with disabilities, to walk and bicycle to school and to make walking and bicycling to school safe and appealing.

The City of Corning is a Safe Routes to School participant with designated routes to the Corning High School, and Gregg Elementary School. These routes have properly designed crosswalks and shared bike lanes. Signage in compliance with the Manual of Uniform Traffic Control devices has also been posted.

This program brings a wide range of benefits to students and the community. These include an easy way for children to get the regular physical activity they need for good health and even to ease traffic congestion and reduce pollution around schools.
