

Stormwater Agreements

Rain and melted snow runs off streets, lawns, parking lots and other sites. Managing this runoff is important to protecting the environment. Improper stormwater management can lead to:

- Downstream flooding
- Riverbank erosion
- Increased turbidity (muddiness created by stirred up sediment) from erosion
- Habitat destruction
- Combined storm and sanitary sewer system overflows
- Infrastructure damage
- Contaminated streams, rivers and coastal water

The City of Corning has worked to reduce runoff and improve water quality by requiring stormwater management plans as part of the site plan process administered by the Planning Commission. On large projects, the Planning Commission has required developers to enter into stormwater management agreements when needed to ensure the engineered stormwater solutions are properly maintained.

<u>Project</u>	<u>Date of Agreement</u>
Hilton Garden Inn	May 19, 2015
Hospital Redevelopment Phase I (Corning Community College Facility)	January 3, 2017
Corning Hospital Redevelopment Project Lots 1 & 2	April 2, 2018
St. Mary's Church Parking Lot	January 7, 2019
Lamphear Court Apartments - Phase I	June 7, 2019
